

0.7 Capstone Assignments Time Estimates

Capstone Assignments - Time Estimates

To prepare you for the capstone, we want to provide you with some time estimates for each assignment. Please remember that these are just estimates--it may take you less or more time to complete the assignments. We want to provide you this so that you can schedule your learning during the capstone. If you are spending way more time on an assignment than what is estimated here, that is a good indication to ask for help on the discussion forums. Please also consider that there are videos and readings in each week as well. Each week should take you between 2-6 hours to complete.
